GUARANTEED TRUE TO NAME  
AND AS GOOD AS  
THE BEST

THE SAN DIMAS CITRUS NURSERIES were established in 1890, and we are here to stay; hence in patronizing them you avoid the risk of buying from parties who may be in the business to-day and out of it before your trees come into fruiting and the possible heavy losses resulting from untrue-to-name trees are discovered.

# TO PURCHASERS

**TERMS**—State specifically the size and variety of trees you want, and also give a few general hints as to your soil and climatic conditions. From unknown parties we demand a remittance or deposit of 50% of order or good references. Send money by bank draft, postoffice or express order, or registered letter.

**LOCATION**—The land upon which our nurseries are situated is conceded to be the best for growing citrus nursery stock, producing a fine grade of tree with a vigorous root system making transplanting safe.

**QUALITY OF STOCK**—All of our trees are grown to stakes, and are straight and thrifty, and well rooted. Good stock is the foundation of success. He who plants an orange or lemon grove, plants for generations; hence, in choosing stock be careful to get only the best obtainable.

**PACKING**—We pack all trees in the best possible manner, in crates and boxes, according to the size of order and distance of shipment. Trees are sent with safety to any part of the United States or foreign countries.

**GUARANTEEING TREES**—We guarantee all trees shipped from our nurseries to be as represented. We personally attend to the budding of all our trees, and use the utmost care to insure them true to name.

**TRANSPORTATION FACILITIES**—Our transportation facilities are excellent, being midway between the Southern Pacific and Santa Fe railways, hence we ship via either road, also Pacific Electric.

**SHIPPING INSTRUCTIONS**—Please furnish explicit directions for shipping and by what route. In the absence of any instructions we ship according to our best judgment, but in no case do we assume any responsibility for condition or safe delivery of trees after same have been properly packed and delivered to transportation companies.

**CLAIMS**—Legitimate claims for errors and mishaps will be promptly recognized if made within ten days of the receipt of the goods, otherwise we will entertain no claims of this nature.

We make a specialty of selecting extra fine specimens of different varieties for potting or lawn planting. Write us your wants in this line and we will make you quotations on same.

**In Addition to Above Prices.** Above prices for *balled* trees are for delivery at our nurseries or F. O. B. cars in car load lots consisting of 500 or more trees. In small lots for shipment it is necessary to box same to insure safe arrival, and we make an extra charge of 10c *per tree* to cover same. We can ship less than carload lots in the end of a car, without boxing, but all transportation companies charge *double first class rates* which makes the cost more than the boxing.

**Please Take Note.** For any trees taken bare roots and packed in moss in boxes for shipment, there will be a reduction of 5c per tree from the above prices; and if taken open roots and packed in wagons of the purchaser, there will be a reduction of 7 $\frac{1}{2}$ c per tree from the above prices.

**Please Take Note.** On all trees listed in the first column, or in the one year stock of the  $3_8-1_2$  inch grade, we can guarantee no deliveries before May 15th of the year of delivery. Parties taking this grade by March 1st, and up to May 15th, will be subject to the  $1_2-5_8$  in. size, as per price list.

**Please Take Note.** As Citrus trees taken up bare roots are easily affected if not properly handled by planters, and as we have paid a great many claims for such damage which we fully believe was caused after leaving our hands, we do not guarantee any trees taken up in this manner after shipment is made. We exercise every precaution in taking up bare rooted-trees and in packing same, but as stated above will not be responsible from now on for any trees so packed after leaving our hands. We always recommend balling, while it is a little more expensive in first cost, also in transportation, there is practically no chance whatever of loss, as the roots never become exposed to the sun and wind. The small charge for balling is just sufficient to cover labor and material for the work. In justice to ourselves we cannot do otherwise than above, and all buyers desiring trees open roots will take them at their own risk.
